Wear OS by Google

A wearables operating system that brings the best of Google to smartwatches

Works with Android phones and iPhone®

Wear OS by Google works with phones running Android 6.0+ (excluding Go edition) and iOS 10+. Supported features may vary across watches, phones and countries. *Android users may respond to incoming messages, iPhone users can only view incoming messages.*

Setup is quick and easy

Download the Wear OS by Google app onto your iPhone® or Android phone. Attach your smartwatch to the included charger. Once the watch powers on, **tap** to select your language and begin setup. After pairing and setup, your smartwatch will show you an interactive tutorial.

Get Updates -- Upon setup, you will be asked to download the latest software updates. This ensures that you get the most out of your new smartwatch. When your watch begins downloading an update, keep the phone near your watch and ensure it stays charging until the update is finished, as initial setup can drain battery life. For faster downloads, connect to WiFi. Ensure your phone's Bluetooth is on and the Wear OS by Google app is running in the background to keep your smartwatch connected.

Smart Battery Modes -- Fossil Group has partnered with Google to allow users to control the battery life of their watch. Simply swipe down from the top and tap the battery icon to select the mode of choice.

Daily -- Your watch starts in this mode. Most features are turned on.

Extended -- Go multiple days on a single charge, while still enjoying essential features.

Custom -- Adjust all individual settings in one place to create your own experience.

Time Only -- Get a few more hours when your battery is low or weeks on a full charge.

Wear OS by Google

The best of Google, built-in

Google Fit

Meet your health and fitness partner. **Google Fit** and other health apps make it easy to get motivated, stay balanced and track your health--and heart--right from your wrist.
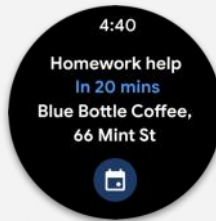

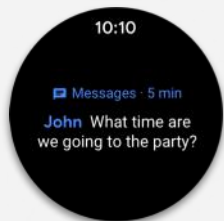

Google Assistant

Stay ahead with proactive help. Ask your **Google Assistant** to manage daily tasks, check the weather, get answers, and more, all while on the go. Press and hold the power button or say 'Ok Google' to activate.

G Pay

Checkout made simple. Set up your card in the **Google Pay** app on your watch, then simply open and twist your wrist to turn your watch face near the terminal until you feel a vibration.

Stay in the moment with smart ways to check incoming messages, calendar alerts, local weather, or control your music right from your wrist, all without pulling out your phone.
