Further information on school organisation and planning can be found on [our website](#).

Legislation and Guidance

Legislation and guidance regarding school organisation is available from the [Department for Education's \(DfE\) website](#).

Current information includes:

- New school proposals
- Establishing a new academy: free school presumption
- Academies: making significant changes or closure by agreement
- Local authority maintained schools (opening/closing and making significant changes)
- Rural primary schools' designation

Admissions policies for Lincolnshire schools are available to download on [our website](#).

Introduction

Local Authorities (LAs) are under a statutory duty to ensure that there are sufficient school places in their area, promote high educational standards, ensure fair access to educational opportunity for all and promote the fulfilment of every child's educational potential. They must also promote diversity and increase parental choice where possible. In order to carry out this statutory duty LAs need to carry out school place planning and forecasting.

School organisation planning is a vital core function of all LAs to ensure that the statutory duty of providing sufficient school places is carried out effectively at a local level with an efficient use of limited resources, working in partnership with education providers.

All LAs receive limited 'Basic Need' capital funding to invest in expanding schools and academies where there is an evidenced based business case to support the need. This is combined with capital contributions from new housing developments to ensure that families can access schools in their communities. The LA continually monitor the pressure on school places across the county to plan where to target available capital that is allocated by central government based on pupil projections and capacity data submitted to the DfE on an annual basis.

The purpose of this report is to:

- Explain the function of pupil place planning
- Highlight the factors and demographic trends effecting the provision of school places in Lincolnshire
- Highlight trends and areas where there is surplus capacity or potential pressure on places if the LA were not to take appropriate action

Increase in demand can lead to the creation of a new school or the expansion of schools to add permanent or temporary additional classrooms. Surplus places can also mean the reduction of school provision in an area through the decrease of published admission numbers (PANs) or the rationalisation of school provision to retain sustainable, viable schools that serve their local areas. Any review of school provision undertaken by the LA (e.g. opening, closing, amalgamating, expanding etc.) will, in part, be assessed in line with the procedures for projecting need as detailed in this document and would be subject to a statutory process for making prescribed alterations to a school or significant changes to an academy.

The Local Context

Lincolnshire is the fourth largest county in England covering an area of 5,921 sq. km; it is predominately a rural county with several large market towns and one city, Lincoln. The county is made up of seven district/borough councils, is bordered by nine local authorities and the east of the county is bordered by the North Sea. It does not include the unitary authorities of North and North East Lincolnshire.

Population

Lincolnshire has a low population density but is experiencing significant population growth overall particularly in urban areas of the county; this has an on-going impact on the availability of school places.

The latest Office of National Statistics research data (published in 2020) shows a population increase in Lincolnshire of 7.8% between 2008 and 2018, the comparable figure for England as a whole is 8%. Updated population projections are scheduled for release by the Office of National Statistics in 2025.

Latest population estimates state that 768,400 people live in Lincolnshire, of which an estimated 167,000 are children and young people aged up to 19 years. This age category of the population is predicted to peak in 2027.

An analysis of birth rate data is provided later on in this report.

Population projections for children and young people aged 0 to 19 by district authority, including county total:

District	2024	2025	2026	2027	2028	2029	2030	2031	2032	2033
Boston	17426	17555	17688	17778	17810	17831	17818	17764	17672	17609

Total	166719	168071	169220	170085	170804	171056	171071	170654	170143	169429

Lincolnshire population projection for children and young people aged 0 to 19:

The table shows the population projections for children and young people aged 0 to 19 years. The data covers a period of 10 years, from 2024 to 2033. The data is broken down by district authority and a Lincolnshire total is provided, the total population projections are also illustrated in the above graph.

Data source: ONS subnational population projections for England (latest release published March 2020).

Available Provision

Lincolnshire provides for approximately 98,100 children aged between 4 and 16 years of age, with 55,150 educated within primary schools, 42,950 in secondary and approximately 2,000 in special/alternative provision.

As at August 2024 the county has;

- 5 nursery schools
- 17 special schools (including a hospital school)
- 280 primary schools (including infant and junior)
- 52 secondary schools
- 1 all through mainstream school catering from the ages of 3 to 18*
- A University Technical College (UTC) catering for years 10 to 13
- 5 alternative provision academies/free schools

Lincolnshire is one of a small number of authorities nationally that offer grammar school provision. There are 15 grammar schools in Lincolnshire, which serve the county. The majority of grammar schools have agreed a qualifying standard which is intended to identify the top 25% of children in Lincolnshire by ability. Grammar schools which are located on the county boundaries historically attract a large number of children from out of county as none of the neighbouring counties have grammar schools.

The LA has supported a number of schools to convert to academy status. For mainstream and special schools, as at August 2024 Lincolnshire has a total of 171 (48%) maintained schools and 185 (52%) academy/free schools.

Number of mainstream schools by district authority:

Districts	Number of LA Nursery Schools	Number of Primary Schools	Number of Secondary Schools	Number Secondary with Sixth Form
Boston	1	18	5	3
East Lindsey	0	59	12	5
Lincoln	2	24	6	7
North Kesteven	0	47	7	7
South Holland	0	36	6	4
South Kesteven	1	52	10	8
West Lindsey	1	45	7	4
Grand Total	5	281*	53*	38

*The Priory Witham Academy is located in Lincoln and is a 3 to 18 school which is included in the primary and secondary school count in the above table.

Provision

Early Years Provision

Under the Childcare Act of 2006 the local authority has a statutory duty to secure sufficient childcare, so far as is reasonably practicable, for working parents, or parents who are studying or training for employment, for children aged 0-14 (or up to 18 for disabled children).

The Expanded Offer

In April 2024 childcare support for working families expanded. By September 2025, eligible working families with children from 9 months to school age will be entitled to 30 hours of funded childcare.

The increased working parent entitlements will be introduced in three phases:

From April 2024, working parents of 2 year olds will be able to access up to 15 hours of funded childcare.

From September 2024 working parents of 9 month olds will be able to access up to 15 hours of funded childcare.

From September 2025, working parent entitlements will increase up to 30 hours of funded childcare per week from nine months to school age.

Funding would start from the term after your child reaches the age of eligibility. The funded hours are provided over 38 weeks of the year, or up to 52 weeks if fewer hours are used per week.

The Previous Offer

This offer will be phased out by September 2025 whilst the expanded offer is rolled out.

Eligible 3 and 4 year olds (and 2 year olds who meet the eligibility criteria) are entitled to 15 hours of funded early years provision from the start of the term beginning on or following their birthday. 30 hours a week is available for eligible working families of 3 and 4 year olds.

Local authorities must ensure that sufficient childcare is available which offers the Early Years funded entitlement. Funded entitlement is provided by a range of different settings including maintained nurseries at schools, private voluntary or independent providers, day nurseries, playgroups, registered childminders and nursery units in independent schools.

Post 16 Provision

Under the Apprenticeships, Skills, Children and Learning Act 2009, local authorities have a duty to ensure that sufficient and appropriate education and training opportunities are accessible to all young people in the county aged 14-19 and those up to age 25 for young people with learning difficulties and/or disabilities.

The table overleaf lists the secondary schools in Lincolnshire that provide post 16 provision. Pupils attending Spilsby The King Edward VI Academy are subsidiary pupils whose main registration is held with Havelock Academy, Grimsby. Both academies are part of the same academy trust.

In addition there are three colleges of further education which have main campuses located in Lincolnshire, these are; Boston College, Grantham College and Lincoln College. Some of these colleges have additional campuses in other areas in and out of the county.

There are other further education colleges outside of Lincolnshire that have campuses within the county. These include Inspire Education Group which operates Stamford College, TEC Partnership which operates Skegness TEC and Bishop Burton College near Beverley which operates the Riseholme College campuses in North Carlton and Lincoln. In addition there is Linkage Community Trust in Grimsby which operates campuses at Toynton All Saints, near Spilsby and Boultham Park in Lincoln providing post 16 special education.

Lincolnshire schools with post 16 provision (Year 12 and 13):

Pupil count data source: School Census January 2024. *The main PAN (published admission number) is the maximum number of pupils the school can admit into the year of entry. ** The 6th form PAN is the maximum number of external pupils the school can admit into its 6th form, (Y12 and Y13).

Special Educational Needs and Disabilities (SEND) Provision

While the majority of the needs of SEND pupils, including those with Education, Health and Care Plans (EHCPs), can be met in mainstream schools, some children need specialist provision that can only be accessed via a special school.

January 2024 school census data states there are approximately 2100 pupils in Reception to Year 11 attending one of the 19 special schools in Lincolnshire, which equates to 2.1% of all pupils at Lincolnshire schools.

The ratio of SEND to mainstream pupils has remained relatively stable, which has meant a growing pressure on the SEND sector in line with primary and secondary mainstream places. Following a comprehensive SEND review in 2018 and the proposal of a new strategy for delivering SEND in Lincolnshire, it was estimated that over 500 additional special school places would be needed over the next 5 years to meet need for these places. Investment is required in special schools to ensure that suitable, effective and efficient SEND provision is in place for the future so that the LA can meet statutory requirements. The LA look for any opportunity to secure additional funding and capacity.

January Census Data	Headcount at Special Schools	Headcount Less Subsidiary*
2024	2137	2026
2023	2250	2145
2022	2200	2074
2021	1922	1805
2020	2062	1953

*Subsidiary pupils are those who are dual registered and a mainstream school hold the registration details.

Lincolnshire Special Schools
Boston Endeavour Academy
Bourne Willoughby Academy
Gainsborough Aegir - A Specialist Academy
Gainsborough Warren Wood - A Specialist Academy
Gosberton House Academy

Lincoln The Pilgrim School (hospital school with three sites)
Louth St Bernard's School
Spalding The Garth School
Spalding Tulip Academy
Spilsby The Eresby School
Spilsby Woodlands Academy

Primary Provision

One of the key challenges Lincolnshire has faced over the last decade, is the demand for primary school places.

In the past, the number of pupils in the primary sector had gradually increased, but there has been a steady overall decline in the number of primary aged pupils starting school in recent years. This trend can vary from one area to another, with some urban areas with significant housing development predicted to increase. In rural areas however numbers generally remain low or continue to face declining numbers, resulting in a high number of surplus places in some areas where birth rates have continued to fall.

Alongside this, Lincoln, Grantham and Boston have seen mid year pressures due to university students relocating to the UK with accompanying families. A change to national policy will see the need for places decline in relation to this, as families are no longer entitled to accompany some students on particular visas.

Significant capital investment has ensured new schools and numerous expansions have provided the extra primary school places required. Due to the sparse rural nature of Lincolnshire the surplus capacity in some rural areas masks the significant pressures in the urban areas when aggregated at district or county level.

Amalgamated capacity and projection data by district level are provided in this document but there can be significant variance in surplus capacity across different areas of the same district.

Significant capital investment from Basic Need has ensured numerous expansions and new schools have provided the extra primary school places needed. With declining birth rates in recent years there are far fewer pressures on the primary sector other than in isolated areas.

Secondary Provision

More recently and over the next few years there has been and will continue to be significant pressure on secondary places as increased number of pupils move through from the primary sector into secondary. The most significant impact for the majority of the county started to take effect from September 2019, and continued towards a peak in between 2022 and 2025, depending on the area.

Many areas are also predicted to see further housing growth. The LA will continue to seek contributions from housing developers to increase provision of school places via section 106 agreements in all areas where local schools cannot accommodate new pupils in existing permanent capacity.

Although statistics may show a wider planning area has places, a town/large village school could be full to capacity and it may be considered unreasonable for pupils living in those communities to commute out of the local area to gain a school place. Local provision is paramount to creating sustainable communities and reducing travel. However, distance must be taken into account. The duty of the LA is to provide sufficient capacity within a 'reasonable' distance. It may not always be possible to plan at a very local level, especially if there could be a potential negative impact on the viability of neighbouring schools nearby.

Amalgamated capacity and projection data by district level are provided in this document.

Satisfaction of Parental Preference

Lincolnshire offers the opportunity to name up to three preferences for both midyear places and the main co-ordinated Reception, Junior and Year 7 intakes.

Satisfaction of parental preference is high. In 2024 99% of Lincolnshire residents applying for a Reception place received an offer at one of their three preferences, compared to 98.8% nationally. For the Year 7 intake the percentage for Lincolnshire residents covering the same period equates to 97%, in comparison to 96 % nationally.

Each year a small percentage of children in Lincolnshire do not receive a place at any of their preferred schools on national offer day. This number is largely affected by those who state only one preference for a popular school. Where no preference is offered, Lincolnshire will offer a place to the nearest school with an available place.

The LA will look to satisfy parental preference, where possible, by monitoring applications received through the coordinated admissions process. Where feasible, the LA will target expansions to oversubscribed schools in order to be sensitive towards parental preference and in particular when considering bulge years and over-offers on existing PANs. I

Reception

In 2024, 95.7% of Lincolnshire children starting Reception received an offer at their first preference school. The average across England for the same period equates to 93.2%.

Year 7

The vast majority of Lincolnshire children starting Year 7 receive an offer at their first preference school on national offer day. The percentage of children receiving a place at their first preference school in Lincolnshire for 2024 equates to 86% for the 2024 intake. The average for England over the same period is 82.9%.

The satisfaction of first preference offers is negatively affected by those who name a grammar school as their most preferred school despite their child not reaching the qualifying standard in the entrance tests. Grammar schools will not admit children who do not reach the required standard, so where this is listed on the application, the applicant will be refused a place but will have the right of appeal.

The results of the entrance tests are released to parents and carers before the application deadline, as per the 2021 School Admissions Code so that parents can make informed decisions on which schools to list as preferences on their application.

To have the right of appeal against non-qualification, the grammar school for which the appeal is for must be named on the child's application as a preference.

Further information on admissions in Lincolnshire, including admissions policies, can be found on the [School Admissions section on our website](#).

Number of Pupils on Roll at Lincolnshire Schools

School census data:

January Census	2019	2020	2021	2022	2023	2024
Primary	56460	56213	55911	55902	55777	55123
Secondary	39247	40091	40744	41708	42504	42964

The table and graph above show the total number of pupils on roll at mainstream primary and secondary schools in Lincolnshire. The data covers a period of six academic years from 2019 to 2024 using the January school census data. Primary figures include pupils at infant and junior schools. Children attending The Priory Witham Academy, an all through school, are divided between the primary and secondary cohorts.

January school census data 2024 by year group:

Primary	Reception	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Pupil Total	7337	7700	7971	8058	8195	8079	8437
Secondary	Year 7	Year 8	Year 9	Year 10	Year 11		
Pupil Total	8823	8623	8445	8570	8043		

The graph shows the total number of pupils on roll at mainstream schools in Lincolnshire in January 2024 by year group. The data provided is taken from the January 2024 school census data. Primary figures include pupils at infant and junior schools. Children attending The Priory Witham Academy, an all through school, are divided between the primary and secondary cohorts.

Pupil Projections Model

The pupil projections model is an important tool, along with other factors, when planning school places. It is the starting point and main quantitative source of information when determining areas with pressure on places and where additional places might be needed.

The model uses birth data (NHS GP Registrations by postcode), housing data (with planning permissions) and migratory trends (tracking of midyear cohort sizes from one year to the next). Secondary projections also take into account historic movement of pupils from feeder primary schools.

The pupil projections for individual schools can vary from the actual number of pupils that attend the school. These variations are mostly due to the changes in parental preference and also as a result of changing demographics (e.g. migration rates) and changes in the housing market related to the state of the economy. School projections are more accurate when aggregated by areas (known as planning areas), as the impact of one school becoming more popular as another becomes less popular evens out. Projections become even more accurate when aggregated up to district and county level.

Planning Areas

In order to carry out pupil forecasts effectively the county is split up into different planning areas. Any decisions on changes to school provision such as the reduction or increase of a schools published admission number is taken within the context of these planning areas. The LA has separate primary and secondary planning areas. Special Educational Needs provision is not made by using planning areas in the same way as the requirement for places does not correspond as closely to demographic change, given the specialised nature of the school places required and the greater distances that the provision must cover. It is important to not though, that decisions on school expansions are not made on planning area data alone. Even within a planning area the distances between schools can be significant and it may not be reasonable to expect parents and pupils to travel that far. If a planning area indicates a surplus or shortfall of places then more granular analysis will take place across the schools within the planning area to determine if action needs to be taken in relation to any particular school or schools.

A list of Lincolnshire planning areas is published in Appendix A.

Relevant Factors in Place Planning

The main relevant factors in school place planning include birth rate, new housing development and migration, which are on the following pages.

Birth Rates

Alongside new housing developments, birth rates continue to be a main contributing factor that continues to put pressure on primary school places in some areas. In previous years an increase in fertility rates and the number of births in Lincolnshire have led to a growth in the number of children starting primary education. Until around 2008 there had been a decline in the birth rate resulting in low pupil numbers and surplus capacity. However this was only temporary and demographic patterns are cyclical in nature with a baby boom seeing significant pressure on the primary sector during the following period. Following this period there was a drop in birth and fertility rates during, and just before the Covid pandemic, although it was widely anticipated that there may be another baby boom over the next few years. This boom did not materialise and instead the birth rate has continued to fall before starting to stabilise at a much lower level in many areas. The impact of births and housing will be monitored as we see falling rolls and a dip in overall primary numbers over the next few years, as the larger cohorts move onto secondary.

This pattern is similar for all districts of Lincolnshire, although more extreme in some more than others with pressure in some areas but falling in others. The birth rate beyond those that have not yet been born is very difficult to predict and so is not part of the LA projections. The ONS projections model is used to look at long term patterns and is based on assumptions regarding fertility, birth rates, number of women of a child bearing age etc. However, this is not available at a geographical level less than district councils, with patterns often variable within districts, particularly more rural ones.

NHS GP Registrations

NHS GP registration data is also used to do bespoke area specific analysis which is necessary when planning capital work. This allows the LA to confirm that the demand for places in an area is local to the school and not just because the school may be popular at that moment in time.

Lincolnshire NHS GP registration data as of January 2024 by district authority:

Intake Year	Reception 2024	Reception 2025	Reception 2026	Reception 2027
	1 Sept 19 to 31 Aug 20	1 Sept 20 to 31 Aug 21	1 Sept 21 to 31 Aug 22	1 Sept 22 to 31 August 23
Districts				
Boston	772	774	747	682
East Lindsey	1114	1071	1095	947
Lincoln	1066	997	990	912
North Kesteven	1128	1067	1024	972
South Holland	965	974	969	793
South Kesteven	1420	1289	1267	1141
West Lindsey	853	856	763	794
Total	7318	7028	6855	6241

Capacity by district authority for Reception and Year 7:

Districts	Reception Intake 2024 Capacity by Determined PANS	Year 7 Intake 2024 Capacity by Determined PANS
Boston	860	783
City of Lincoln	1530	1112
East Lindsey	1793	1512
North Kesteven	1477	1516
South Holland	1079	1104
South Kesteven	1702	1817
West Lindsey	1266	1199
Total	9707	9043

Lincoln secondary capacity excludes Lincoln University Technical College which admits children from Year 10 and has a published admission number (PAN) of 120. This school is also excluded from the Lincoln secondary school count.

The Priory Witham Academy is located in Lincoln and is a 3 to 18 school. The school has a different PAN for the primary and the secondary sectors. In the table above, the school is included in both of the primary and secondary calculations with each relevant PAN in order to provide an accurate figure for the Reception and Year 7 intakes.

Housing Development

As a two-tier authority council, it is vital that the LA continue to gather local planning data from district councils and remain a key consultee in this process. However, it is not a statutory requirement for district councils to consult with the education authority.

At times, a planning application is granted without the knowledge of the LA and without the opportunity to put forward a case for section 106 funding but we aim to ensure that this is rare.

As part of the pupil projections model the total number of houses with full or reserved matters/detailed planning permission, by area, is obtained from each district council and is fed into the system to give an indication of the added pressure. Since October 2023 the ratio used to measure the additional demand for places from new houses presume that 100 new homes would generate an average of 30 primary pupils and 16 secondary aged pupils across all year groups in total.

The housing market and the rate of development are notoriously difficult to anticipate due to unpredictable factors such as the strength of the economy and consumer confidence. The ratio of families with dependent children in the private rented sector and owner occupied housing can also vary which adds another variable. Some areas of the county e.g. Gainsborough, have a high proportion of rental houses.

There are also expected to be some large housing developments in the near future in the county that do not yet have planning permission and are not accounted for in the projections. Section 106 contributions to education are negotiated but rarely cover the entire cost of additional school capacity required and the County Council has to plan for this shortfall. In Central Lincolnshire (NKDC, WLDC & City of Lincoln), no section 106 contributions towards secondary education may be requested; instead works are to be funded by the Community Infrastructure Levy, however this is also unlikely to cover the entire cost of additional school capacity required.

Migration

Migration (external)

Since 2004, when an additional eight nations joined the EU, certain areas of the county have experienced an influx of EU migrant workers and their families which is often linked with agricultural work. This is particularly true in parts of Lincoln, Boston and South Holland (particularly Spalding) where exceptionally high numbers of children from EU migrant families have added to the demographic pressures already caused by increasing birth rates. There is data to give an indication of the numbers of EU migrants that have entered the country, but there is no reliable data that can be used to predict future EU migrant numbers, particularly at local level.

Local knowledge is used to determine, as best as possible, how long these families might stay and the long term impact of their settlement. EU migrant families tend to have large families in relatively small houses which results in more densely populated areas with higher occupancy rates than we are used to in other areas.

In January 2014 work restrictions for the EU member states of Bulgaria and Romania were lifted but we have not seen a significant further influx of migrant workers from these countries.

Brexit also had an impact on families staying in the UK, with anecdotal local evidence to suggest that some families returned to their home country rather than applying for residence rights through the EU Settlement Scheme. The EU Settlement scheme was mandatory for all EU Citizens (excluding Irish) if they wished to remain in the UK. The deadline for application was 30 June 2021 for those who were resident in the UK by 31 December 2020.

Lincolnshire has welcomed Syrian, Ukrainian and Afghan refugees into the county as part of the central government's resettlement programmes.

The first families from Syria arrived in Lincolnshire in 2019. Before families with school age children were accepted, a review was carried out to determine which areas of the county had the capacity in primary and secondary settings. Alongside looking at capacities in schools, local infrastructure was also considered, including local amenities and transport links.

Lincolnshire welcomed more than 1200 Ukrainians since the launch of the Homes for Ukraine scheme in March 2022, with hosts offering temporary accommodation across the county. Due to the Homes for Ukraine Scheme Lincolnshire County Council were not required to identify a specific area in the county that had capacity within schools, instead families were dispersed across the county living with hosts and places were offered at a variety of schools.

A number of Afghan families resettled in Lincolnshire in 2021. Like the Syrian refugees, areas within the county that had capacity in schools were identified. The initial families arrived in South Kesteven and were housed in Home Office appointed hotels whilst awaiting an onward location around the country. There are not currently any Home Office appointed hotels in Lincolnshire housing families.

Migration (internal)

Internal migration within the county and inward migration from other counties within the UK affects the level of demand for school places in Lincolnshire, particularly around the border. There is a continuing trend for young families to choose to live in, or closer to, the more urban areas where the infrastructure (road network, services etc.) and jobs are more readily available. The low cost and high standard of living in Lincolnshire, along with the excellent reputation of the schools contributes to the attraction of children and families from outside of the county. This includes those that wish to commute from over the county border as well as those that relocate to live in Lincolnshire from further away.

Lincolnshire is a net importer of secondary age pupils from over the county boundary, mostly due to the selective grammar school system. Based on the 2024 Year 7 intake, outward migration equated to 3.8% of children resident in Lincolnshire, the comparative figure for inward migration based on the total number of children offered Lincolnshire schools was 8.2%. The rural nature of Lincolnshire means that families living in more sparsely populated areas are often more willing to travel greater distances to get to their school of preference, even if it is not their closest school.

Statistics from the 2021 national census:

- 11% of Lincolnshire residents were born outside the UK. 8.5% of Lincolnshire residents hold a non-UK passport. (Where a person held more than one passport, to prevent double counting they were categorised in the following priority; UK, Irish and other).
- In 2021 89% of Lincolnshire residents were born in the UK, compared to 83.2% nationally.
- In 2011 7.8% of Lincolnshire residents who were born outside the UK, compared to 11% in 2021.
- The non-white population make up 4.1% of Lincolnshire's total population, compared to 18.3% nationally.
- 92.7% speak English as their main language and 5.4% are fluent in English as their non-main language.

Armed Forces

Ministry of Defence data shows that in April 2024 there were an estimated 6090 members of the Armed Forces stationed in Lincolnshire, plus 'associated residents'.

There are a high number of RAF bases in Lincolnshire which have an influence on the pattern of primary and secondary aged pupils requiring places at Lincolnshire schools. Bases include Coningsby, Waddington, Digby and Cranwell. In addition there is The Prince William of Gloucester Barracks near Grantham, which was due to close in 2020, but this has since been extended to 2028. Just over the county border there is Kendrew Barracks (former RAF Cottesmore) in Rutland and RAF Wittering in Peterborough. Changes in the number of personnel as a result of national and local defence policy can have a direct impact on local demographics. Partner organisations such as BAE systems also employ large numbers of people to work on RAF projects. Additionally, proposals to bring overseas personnel back to the UK and place them at bases may have an impact on nearby areas.

The LA attempt to work closely with the MOD to try and ensure timely and accurate data and knowledge is used to inform the place planning process. This includes information regarding the movement of MOD personnel to and from bases around the county and data from the MOD medical records showing pre-school pupil numbers not registered with NHS GPs.

All of these factors are considered when planning places at schools that serve these areas. Unfortunately, the detail of information from the MOD is limited and sometimes not provided in time for effective planning due to the nature of MOD structure, policy and procedures.

There has been an increase in housing stock owned by the MOD in Lincolnshire with new housing bought in the areas of Sleaford, south west Lincoln and North Hykeham. This could add unpredictable pressure to schools in those areas if the actual pupil yield rate varies from what is included in the projections model for new housing. The detail of information from the MOD is limited and sometimes not provided in time for effective planning due to the nature of MOD structure, policy and procedures.

Private Education

In 2021 there was an increase in the proportion of children opting for state funded education, partly due to the economic climate and the Covid-19 pandemic.

The 2022 The Independent Schools Council (ISC) census reported an increase in pupil numbers, these figures have continued to increase by a reported 1.6% between its 2022 and 2023 annual censuses, with the overall pupil numbers surpassing its pre-pandemic high

The 2024 ISC Census reported that between 2023 and 2024 there was a slight decrease of 0.1% in pupil numbers. Additionally 2024 data reports a decrease of 2.7% in new pupils. One factor that may be influencing this decline is the introduction of VAT, at the standard rate of 20% being added to private school fees from January 2025. This includes advance payments for the January 2025 term paid from 29 July 2024.

Pupil numbers at private schools have overall on average decreased, however the rate changes by region and some have seen an increase of between 0.1 and 0.6%. The East Midlands overall has experienced a decrease of 1.3%. In comparison Wales experienced a decrease of 2.1% and the North East has seen an increase of 0.6%.

In Lincolnshire there are 16 independent schools, of which 5 have boarding facilities. There are approximately 1700 primary aged children educated in Lincolnshire independent schools and 1400 secondary aged children. Some families choose not to educate their children in the independent sector for the duration of their schooling, with some later accessing secondary state education, particularly at grammar schools.

Seasonal Variations

Seasonal agricultural or tourism related employment have a significant impact on the number of pupils in some parts of the county over the course of the academic year. This particularly affects South Holland and the east coast. This is taken into consideration when planning school places to ensure that there are sufficient places available when numbers are at their peak. This requires that there is surplus capacity out of season during the winter period but this is very challenging to manage, fund and sustain.

Travellers

In some areas of Lincolnshire significant numbers of Travellers have an impact on the amount of children on roll at nearby school(s). Some Traveller sites are more settled than others. Where there has historically been a traveller element in a community then local knowledge is taken into consideration; this will be accounted for in the local migration trends and fed into the projections. We are unable to plan for when travellers might move into a site as this often occurs at short notice and mid-year.

Opening New or Expanding Existing Schools

If there are insufficient spaces across a planning area, mainly due to population growth and/or new housing developments, there are a number of points that need to be considered before solutions are identified, discussed with local providers and presented to the portfolio holder for inclusion in the Children's Services Capital Programme.

Local schools are analysed to determine the most appropriate for expansion. The criterion for this includes; where children live, location of major housing developments and which schools have space to expand.

The LA continues to work with all potential and existing sponsors to address school place sufficiency needs. In determining the best potential solution to meet the needs of the local community both expansion and new school options may be considered depending on the circumstances.

If it has been determined that the LA must provide additional school places, and expansion or a new school are being considered, then the following points highlight some of the factors taken into consideration (in no particular order):

- Affordability – efficient use of limited resources (capital and revenue).
- Site sizes and deliverability (potential planning issues, avoid building on playing fields, access etc.).
- Location in relation to demographic pressures – consideration to transport and traffic implications and reasonable safe walking distances where possible.
- Future housing developments and any current or potential Section 106/CIL contributions to education.
- Parental preference (this can be a short term factor as this often changes over time with changing leadership, governance and Ofsted ratings).
- Potential impact on standards – strength and quality of leadership and governance of existing schools in relation to being able to effectively implement an expansion proposal and manage the transition.
- Potential impact on existing provision and the impact plans for academies and free schools in the area may have on the need for additional school places.

Whilst quality of provision is taken into account when exploring expansion options, in some areas the solutions have to be driven by geographical and financial constraints. In some cases growth may be a catalyst for school improvement but we would ensure this expansion does not detract from the school plans and aspirations towards raising attainment and teaching quality.

Other issues that need to be taken into consideration involve the school's capacity to expand. This is not just centred on infrastructure such as hall space, playing fields or access but the management and staffing structuring of the school which would likely need to change.

Any new school that opens must be a free school. The Local Authority will seek proposals from the Department for Education (DfE) approved sponsors to run a new free school. This process is run by the LA who assesses submitted proposals and shares the results with the Secretary of State. Alternatively a potential sponsor may choose to submit a direct application to the DfE to open a free school, and the LA may or may not choose to support that application (as a consultee) depending on the level of need.

Actual and Projected Pupil Numbers by District Authorities

The following graphs provide an illustration of actual and projected cohort sizes across Lincolnshire over a six year period. Graphs are provided for the Reception and Year 7 intakes.

Actual numbers for 2021 to 2024 are based on the January school census data for the relevant year of intake; midyear movement is not factored in.

2025 to 2027 figures are projections calculated using the pupil projection method as explained in this document. These figures are recalculated on an annual basis. The projections figures provided in the graphs were calculated in 2024. Due to the high number of planning areas in Lincolnshire, figures are provided at district authority level. In addition because of the rural nature of the county, some planning areas contain one school and projected figures in these cases can be deemed as commercially sensitive.

A map of the district authorities in Lincolnshire is provided in this document and the schools within each district are published in Appendix A.

District Authorities in Lincolnshire

Boston Borough (BBC)

Boston Borough, also known as the Borough of Boston, is a local government district in Lincolnshire. It covers an area of 140.9 square miles (364.9 square km). It is bordered by three other district authorities and The Wash to the east. Boston, a market town with a small port, is the largest community located within the borough. ONS population estimates indicate there are approximately 74,200 people residing in the district.

East Lindsey (ELDC)

East Lindsey local government district covers an area of 681 square miles (1,765 square km). ONS population estimates the district had a population of approximately 147,600. Major settlements in East Lindsey include Louth, Alford, Spilsby, Mablethorpe, Skegness and Horncastle. Several of the planning areas within East Lindsey border the North Sea. East Lindsey is also the home to RAF Coningsby.

Lincoln City (LCC)

The urban local government district of Lincoln City covers an area of 13.78 square miles (35.69 square km). Mid-2016 ONS population estimates that the district has 99,700 living within the area. Lincoln City is the smallest district within the county and is situated between West Lindsey to the north and North Kesteven to the south.

North Kesteven (NKDC)

North Kesteven local government district is located in the centre of the county with Nottinghamshire bordering to the west. It covers an area of 356 square miles (920 square km) which is mainly classified as green space. It has an estimated population of 122,500 based on ONS population data. North Kesteven is home to the towns of Sleaford and North Hykeham, as well as several large villages. Additionally the RAF bases of Cranwell, Waddington and Digby are located in the district.

South Holland (SHDC)

South Holland is predominately rural district located at the south of the county; it covers an area of 310 square miles (803 square km). The Wash and the county of Norfolk border the district to the east, and the county of Cambridgeshire and Peterborough unitary authority to the south. The Lincolnshire districts of Boston Borough, North Kesteven and South Kesteven border the district to the north and west. ONS population figures estimates a population of 99,300. South Holland is home to the towns of Spalding, Holbeach and Crowland.

South Kesteven (SKDC)

South Kesteven local government district covers the towns of Grantham, Stamford, Bourne and Market Deeping. Within Lincolnshire it borders North Kesteven and South Holland. The west and south of the district borders Nottinghamshire, Leicestershire, Rutland, Northamptonshire and the unitary authority of Peterborough. The district covers an area of 363.9 square miles (942.6 square km) with an estimated population of 146,300 based on ONS population estimates.

West Lindsey (WLDC)

The local government district of West Lindsey is a rural district with several large towns and villages, it covers Gainsborough, Market Rasen, Cherry Willingham, Welton and Caistor and it is also the home to RAF Scampton. ONS population estimates state there are approximately 97,800 residents within the district. Nottinghamshire borders West Lindsey to the west, and North Lincolnshire and North East Lincolnshire to the north. East Lindsey borders the east of the district and North Kesteven and Lincoln City to the south.

Population statistics for each district authority are 2024 population projections provided by the Office of National Statistics (ONS).

Map of Lincolnshire District Authorities

Actual and Projected Reception Numbers, including Capacity

'Actual' figures provided are based on October school census data for the relevant year of intake.

Current projections for some districts indicate that there may be a shortage of school places if additional capacity is not created. The Local Authority are working with providers and considering proposals to add capacity in areas of need. Permanent or temporary expansions, along with working with schools/academies to over-offer where possible, will ensure that the LA continue to meet local need through strategic planning and effective use of all available resources to provide sufficient school places. Capacity created by any future projects has not been factored into the available capacity shown in these graphs. Capacity data is also based on PANs and does not include bulge years, where a school has taken over its admission number for that particular year.

Boston Borough

Year	Number on Roll	Projections	Capacity
2021	756	-	880
2022	780	-	880
2023	736	-	860
2024	661	-	860

Glossary

Academy

Academies are publicly funded independent schools that receive money direct from government. They are run by an academy trust and some academies will involve sponsors from businesses, universities, other schools, faith or voluntary groups. A maintained school can apply to the Secretary of State to convert to an academy.

Admission Arrangements

The overall procedure, practices and oversubscription criteria used in deciding the allocation of school places including any device or means used to determine whether a school place is to be offered.

Admission Authority

The admission authority is the body responsible for setting and applying a school's admission arrangements. For community or voluntary controlled schools, this body is the local authority unless it has agreed to delegate responsibility to the governing body. For foundation or voluntary aided schools, this body is the governing body of the school. For academies and free schools, this body is the trust.

All-through School

All-through schools teach primary and secondary pupils within the same establishment, they may also have a nursery and/or sixth form.

Basic Need Funding

Basic Need Funding is money the Department for Education (DfE) give to local authorities each year to help them fulfil their duty to make sure there are enough school places in their local area.

Brexit

Brexit is term for the withdrawal of the United Kingdom from the European Union.

Bulge Year

A bulge year or bulge is a term used to describe when a school has admitted pupils over its published admission number (PAN) at the request of the Local Authority.

Census

Every ten years the Office of National Statistics (ONS) conducts a national census across the UK. A census provides a detailed snapshot of the population and its characteristic and underpins funding allocation to provide public services. The last census date was 2021. *For school census data collection, please see 'School Census'.*

Department for Education (DfE)

The DfE is responsible for children's services and education, including school admissions and school organisation and planning.

Education and Skills Funding Agency (ESFA)

The Education and Skills Funding Agency is the part of the DfE responsible for the operation of the education capital and revenue funding system. This includes the direct funding of Academies and Free Schools and all 16–19 provision in maintained schools, further education colleges, sixth form colleges and independent provision.

Education, Health and Care Plan (EHC Plans)

An Education, Health and Care Plan (EHC Plan) is for children and young people aged up to 25 who need more support than is available through special educational needs supports. EHC Plans identify educational, health and social needs and set out the additional support to meet those needs.

Free School

Free Schools are publicly funded independent schools that receive money straight from the government. They are run on a not-for-profit basis and can be set up by groups such as charities, universities, independent schools, community and faith groups, teachers, parents and businesses.

Governing Body

Governing bodies are corporately responsible for conducting schools with a view to promoting the highest standards of educational achievement.

Grammar School

A 'grammar school' is defined by School Standards and Framework Act 1998 as a school which selects all (or substantially all) of its pupils on the basis of academic ability. In Lincolnshire, for the year of entry, children usually sit a verbal and a non-verbal reasoning test.

Independent School

Independent schools are fee-paying private schools and are funded through their own means. They are independent of many of the regulations and conditions that apply to state funded schools. Some older independent schools are known as public schools. Preparatory schools (prep schools) are independent schools that educate younger children.

Independent Schools Council (ISC)

ISC is an organisation that acts on behalf of its members. It brings together seven associations of independent schools, their heads, bursars and governors, representing over 1,200 independent schools in the UK and overseas. The ISC provide research and intelligence about the independent sector, and legal and regulatory information.

Intake

Intake refers to the main co-ordinated year of intake for a school. For infant and primary schools this is the reception year group. For junior schools, this refers to year 3. For secondary schools this relates to year 7. For all-through schools the main year of intake is reception. In Lincolnshire, if there are any remaining places available for the future year 7 cohort at an all-through school, these places are allocated as part of the co-ordinated year 7 intake. University Technical College (UTC) admit children from year 10.

Maintained School

A maintained school is funded and support by the Local Authority (LA). These include foundation schools, community schools, voluntary controlled schools and voluntary aided schools. Some special schools and nurseries are also maintained.

National Offer Day

The day each year on which Local Authorities in England are required to send school place offers for the co-ordinated years of entry e.g. Reception, Year 3 and Year 7.

Office of National Statistics (ONS)

The ONS is UK's largest independent producer of official statistics and the recognised statistical institute of the UK.

Ofsted

Ofsted is the 'Office for Standards in Education, Children's Services and Skills'. They inspect and regulate services that care for children and young people, and services providing education and skills for learners of all ages.

Parental Preference

A maximum of three preferences can be stated on a Lincolnshire application. Although preference can be expressed, there is no guarantee that a place will be offered at a preferred school.

Published Admission Number (PAN)

A PAN is the admission limit an admission authority sets which states the official number of places a school can offer in the relevant year. For the year of entry, if there are sufficient applications, a school must admit up to this limit. If there are fewer applications than places a school will not reach this limit. A school is able to offer places over its PAN. A grammar school is not required to offer up to PAN if there is an insufficient number of pupils who have met the minimum standard in the entrance tests.

Pupil Referral Unit (PRU)

PRUs are a type of alternative provision which provide education for children who are unable to attend a mainstream school.

School Census

The school census is a statutory data collection for all maintained and non-maintained schools in England. The school census collects information about individual pupils, such as ethnicity, attendance, special educational needs. In addition it collects information about the schools, such as their education provision. There are three collections per year, in January, May and October. *For the national census, please refer to 'Census'.*

Section 106 (S106)

Under the Town and Country Planning Act 1990 (as amended) S106 agreements are legal agreements between Local Authorities and developers which are linked to planning permissions. They are drafted when it is considered the development will have significant impact on the local area, such as Education, which can't be moderated by a condition attached to the planning decision. Under S106 contributions can be sought from developers towards the costs of providing education.

Special Educational Needs and Disability (SEND)

SEND is an acronym used to refer to children or young people where it has been identified they have needs or a disability that affects their ability to learn. Some children may be eligible for SEND support or an Education, Health and Care Plan (EHCP).

Special Schools

Special schools cater for children and young people with a high level of special educational needs or disabilities. Children who attend special schools usually have an Education, Health and Care Plan (EHCP).

University Technical College (UTC)

UTCs are secondary schools for 14-19 year olds, which are backed by employers and a local university. They deliver education that combines technical, practical and academic learning, focusing on science, technology, engineering and maths.

Appendix A

Primary Planning Areas

DfE No.	School Name	District	Planning Area
9252142	Alford Primary School	ELDC	Alford Primary
9255209	Huttoft Primary School	ELDC	Alford Primary
