Fund Overview

The WisdomTree India Hedged Equity Fund seeks to provide exposure to the Indian equity market while hedging exposure to fluctuations between the U.S. dollar and the Indian Rupee.

Why INDH?

- Gain broad equity exposure to Indian companies
- Currency Hedge mitigates exposure to fluctuations of the Indian Rupee
- Use to maintain Indian equity exposure while neutralizing currency fluctuations of the Indian Rupee relative to the U.S. Dollar

Performance of less than one year is cumulative. You cannot invest directly in an index.

Performance is historical and does not guarantee future results. Current performance may be lower or higher than quoted. Investment returns and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance data for the most recent month-end is available at wisdomtree.com/investments.

WisdomTree shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Total Returns are calculated using the daily 4:00pm EST net asset value (NAV). Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns you would receive if you traded shares at other times.

There are risks associated with investing including possible loss of principal. Foreign investing involves special risks, such as risk of loss from currency fluctuation or political or economic uncertainty. This Fund focuses its investments in India, thereby increasing the impact of events and developments associated with the region that can adversely affect performance. Investments in emerging, offshore or frontier markets such as India are generally less liquid and less efficient than developed markets and are subject to additional risks, such as of adverse governmental regulation and intervention or political developments. Investments in currency involve additional special risks, such as credit risk, interest rate fluctuations and derivative investment risk, which can be volatile and may be less liquid than other securities, and the effect of varied economic conditions. Due to the investment strategy of this Fund, it may make higher capital gain distributions than other ETFs. Please read the Fund's prospectus for specific details regarding the Fund's risk profile.
